IOP GROUP INTRODUCTION

IOP groups (Technology 4 Your Benefit Inc, Business Technology Solutions, LLJON Technology) provides cutting edge technologies with deep-dive analysis and commentary on the most important topics and issues affecting insights for the Connected World. We have set out a number of initiatives to encourage research into networking technologies, including the Internet of Things (IoT), Wireless technologies and 5G mobile networks for **THE NEW IT REALITY**.

We are set for R&D into intelligent mobility, and new IT reality focusing in particular on car technology and energy, wireless, data science, and innovative signal processing technologies; and for research hubs to encourage IoT applications in health, financial, social care, smart farm, energy and smart cities. Smart City technology could prove transformative, as well as providing significant opportunities for supporting jobs and growth. Our related topics are Internet of Things (IoT), Mobile networks, Telecoms networks and broadband communications, IT legislation and regulation, IT for telecoms and internet organizations, IT for government and public sector, IT innovation, research and development, Mobile networking, Healthcare and NHS IT, cloud computing, Big data (Deep learning), M2M, and more.

We are also a technology service-based company. We specialize in providing all Custom and professional Computer and Information Technology (IT) along with cutting edge technologies. The company was founded out of the love of technology and started its doors in the year 2012. We have over 20 years of in-the-field real-world experience and numerous total years of formal technology education in our service areas and are constantly performing Research and Development to bring you the next really useful technology.

SEE MORE

Today all industry faces tremendous challenges due to changing regulatory / compliance requirements and new technology adoption (Cloud and Mobile services). This has led to increased security threats. To be successful in this changing climate, it is critical for all industries to reassess their Data security Risk and Physical security Risk. Effective Security management requires clients to evaluate their Security and Risk management strategy and controls and creating a unified risk framework and focusing on ROI (Return on Security Investment).

The Managed Technology Services Plan from T4URB consists of various service level offerings that provide affordable proactive IT management and support. Utilizing our unique framework for providing managed IT services, T4URB provides a range of proactive services designed to optimize your technology investment and maximize the productivity of your people and business.

T4URB's Computer and IT Services is a leading IT solutions provider, and a IT solution consultant in all types of Electronic and Data Security Products.

We are also support to you for a premium Computer and IT solutions headquartered in Houston.
